

i SERIES:

Powerful, intelligent and technically perfect energizers.

With their power, intelligence and technical perfection, the energizers in the i Series are the best in the world! Furthermore, you always receive the best possible service and installation advice from a Gallagher specialist.

ULTIMATE POWER

- Adaptive Control® provides a continuous voltage on the fencing, any time anywhere, with the lowest possible electricity consumption
- Burns away vegetation
- Maximum power, even at the end of the fencing

ABSOLUTE CONTROL

- Extremely practical and easy to operate
- Be warned immediately and anywhere
- Always aware of the state of the fencing with the Energizer Controller®

OPTIMUM SERVICE

- Product and installation advice from the Gallagher specialist
- Now with a 7-year warranty. Check the (promotional) terms and conditions at www.gallagher.eu/warranty
- Global presence with more than 6,000 points of sale in Europe

**FOR MORE INFORMATION ABOUT THE i SERIES,
PLEASE VISIT WWW.GALLAGHER.EU**

The external display enables you to read out information about your fencing from a distance and to operate the energizer.

The energizer adapts to the fencing conditions in order to minimise the energy consumption.

 INCLUDED

 SOLD SEPARATELY

SPECIFICATIONS i SERIES

	Maximum output voltage (V)	Voltage with a resistance of 500 Ohm (V)	Voltage with a resistance of 100 Ohm (V)	Stored energy (J)	Maximum impulse energy (J)	Without vegetation (km) (recommended)	Light vegetation (km) (recommended)	A lot of vegetation (km) (recommended)	Fencing surface (ha) (recommended)	Options
M2800i 306315	7000	6400	5400	21	14	53	21	11	120	    
M1800i 304304	7000	7000	5200	14	10	43	17	9	75	    
M1200i 303307	8100	8100	3800	11	6,6	32	13	6	48	   

ENERGIZER

RELIABLE & ADAPTIVE PERFORMANCE EVEN IN EXTREME CONDITIONS

- Consistent fence performance regardless of extreme temperature conditions or unreliable power supply
- User safety and reliable animal control with built in lightning and short circuit protection
- Better fence management with output, earth and fence voltage alarms

ENERGIZER CONTROLLER

GROUND BREAKING INNOVATION, TOTAL PEACE OF MIND THAT YOUR FENCE IS WORKING AS IT SHOULD

- Displays voltage & current readings at the Energizer and for up to 6 attached Fence Monitors
- Locate in a convenient spot for instant updates eg: side of the shed
- Locate fault zones quickly & use the Controller to turn the Energizer on/off

FENCE MONITOR

A WATCHFUL EYE ON ALL CORNERS OF YOUR FENCE

- Add up to six fence monitors on your fence system to turn it into a fully monitored set up that keeps the Energizer Controller constantly up to date with fence/zone performance (fence voltage and current)
- Identifies when any zone has a fault and reports back alarms to Energizer and Energizer Controller
- Locate fault zones quickly and use the Remote/Fault Finder to pinpoint the problem

REMOTE

SAVE HOURS SEARCHING FOR & FIXING FAULTS

- The Remote pinpoints the fault and enables you to turn off the Energizer during repair and on again once complete
- Shows fence voltages, current and alarm status for the Energizer and the Fence Monitors
- One Remote can be used on multiple Energizers or use multiple Remotes on one (or more) Energizers

SMS ENERGIZER CONTROLLER

IMMEDIATE FENCE INFORMATION AT YOUR FINGERTIPS

- Fence performance information sent via SMS to your mobile. Turn the Energizer on/off from your mobile
- Turn energizer ON/OFF from your mobile

ALARM CONTROLLER

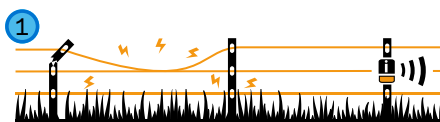

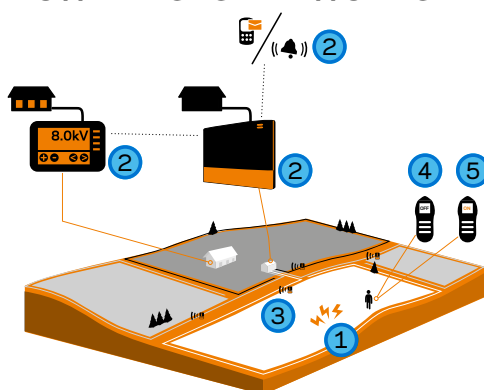

SECURE FARM ASSETS

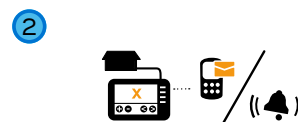

- Monitor a section of fence and drive external strobe lights, sirens or alarm panels
- Alarm System provides an alarm on the Energizer Controller, Remote or your phone (via the SMS Energizer Controller), should an electric gate be opened or wire cut
- Connect to the energizer by wired connection

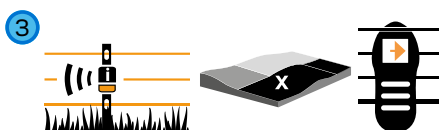

HOW THE SYSTEM WORKS:

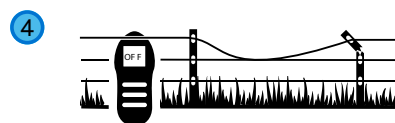

Significant drops in fence or Energizer performance raise alarms

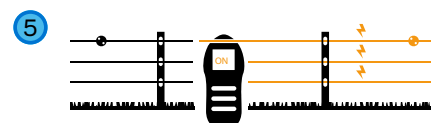

Alerts are sent to the Energizer Controller, your mobile phone (via optional SMS Energizer Controller) and/or optional Alarm System

When used with Fence Monitors, the Controllers (and optional Remote) indicate which zone is in fault. The Remote is used to find the fault within the zone

Power to the fence at the fault location is turned off using the Remote, allowing a safe and convenient repair

Once the fault is repaired, power is restored to the fence and tested using the Remote

GALLAGHER'S ADVICE

I create fence zones by installing the fence monitors at strategic locations on my fence. The monitors continuously inform me about the fence performance, in case of any interruption I'm informed on my mobile. I don't have to check the complete fence myself anymore. This saves me time and peace of mind to focus on running my farm.
