

511009

Live Fence Indicator

High Visibility

LED light flashes to indicate fence is working effectively. Is easily visible during day and night (up to 1km at night)

Low Voltage Cut Off

Will not flash if the fence voltage is too low

No Batteries Required

Uses power from the fence

Quick and Easy Installation

Place earth stake in the ground and simply clip onto fence wire or tape (up to 40mm width)

Long Life

Water and UV resistant

Provides convenient visibility when installed (via a quick three step process) in strategic locations including the home and driveways.
